

Disha Deo

Graduation Year: 2015

Experience: 2 Years

Organization: KPIT Technologies

Disha Deo says....

It is correctly said that college days are the best days of your life! While in college like K.K Wagh it just seems to be so true. My engineering journey at K.K.Wagh has indeed been very memorable and splendid.

I being a K.K.Wagh alumni consider myself very fortunate to be educated in one of the good colleges in Maharashtra. I being from BE. Electronics 2015 Batch, currently working in KPIT technologies Pvt. Ltd. Pune. I am working as a software developer in KPIT and have recently completed 2 years successfully.

I feel obliged to share that the academic exposure and placement opportunities that our college has given us had proved indeed beneficial to us that has definitely helped us in shaping our carrier.

Moreover, I would like to say that, being indulged into the cultural and organizational activities throughout my engineering journey has helped me to groom myself up to a great extent.

As our college always provides number of opportunities and different platforms to us, so that we can explore and groom ourselves.

At last, I feel glad to say that my journey at K.K Wagh has truly helped me to develop my personality, identify and nurture my skills and has helped to become a better individual!
