The Expert Lecture on Raspberry pi was held on 8<sup>th</sup> August 2022 in the department of E&TC Engineering at Karmaveer Kakasaheb Wagh Institute of Engineering Education and Research (K.K.W.I.E.E.R.), Nashik.

The session was conducted by Mr. Dipankar D. Khartad. He is working as an assistant professor in Electronics and Telecommunication Engineering Department of KKWIEER, Nashik.

Initially Khartad sir explained all information of Raspberry pi to students. Also he gave deep introduction about raspberry pi and its uses. Raspberry pi is used to learn programming skills, build hardware projects, do home automation, implement Kubernetes clusters and Edge computing, and even use them in industrial applications. One of the main differences between raspberry pi and arduino two boards is that Arduino is a microcontroller board (a physical programmable circuit board), while Raspberry Pi is a microprocessor (used to perform ALU operations – Arithmetic Logic Unit) based minicomputer (SBC).

Raspberry Pi supports C/C++, Python 2/3, and Scratch by default. However, nearly any language compiler or interpreter can be installed on Raspbian OS. If you're interested in learning the basics of coding and software development, check out our Coding Essentials Guidebook for Developer

After that he explained all commands and shows the practical to download the program on boards and test the code and run it. This practical helps students to test the codes and run various applications.

The session was conducted for two hours. It provided the insights of how students can prepare project using raspberry pi.

The Expert Lecture on How to prepare report in latex was held on 8<sup>th</sup> August 2022 in the department of E&TC Engineering at KarmaveerKakasahebWagh Institute of Engineering Education and Research (K.K.W.I.E.E.R.), Nashik.

The session was conducted by Mrs. Shweta Shevagekar. She is working as an assistant professor in Electronics and Telecommunication Engineering Department of KKWIEER, Nashik.

Initially Shweta Ma'am explained all steps to download and install latex software to students. Also she gave deep introduction about latex software and its uses. LaTeX is a language for creating scientific documents. In fact it might be better to call it the language for creating scientific documents; much its syntax has been borrowed by other environments, in particular where creating anything involving mathematical expressions concerned.

Writing a Latex document is a little like writing a computer program, or a web page: you write your text, marked up with commands to specify its structure? You then compile this with a Latex interpreter, and it generates an output file that you can view on screen or print— most typically a PDF file. As such, just like with programming languages, there is a wide variety of programs available for writing Latex code, from bare text editors to feature-rich development environments. Today we will be using TexStudio for this purpose.

After that She explained all commands useful in latex, how to build report and create a pdf.

The session was conducted for two hours. It provided the insights of how students can prepare report, documents in latex.

An expert lecture on Preparation for MPSC was organized by the Department of Electronics and Telecommunication Engineering on 22<sup>nd</sup> August, 2022. Dr. Jayandra Lekurwale, HoD of Defence and Strategic Studies, Dr. Annasaheb G.D. Bandale Mahila Mahavidyalaya, Jalgaon was the speaker. Total 71 students were present for the lecture.

During the speech, he shared his journey of success. He explained the basics of the competitive exams like various posts for which exams are conducted, their method of conduction and finally duties and perks of these posts. Further, he interacted with the students as to how to prepare and study for such exams, what memory techniques can be used to remember the huge data, method of study, use of various website which provide assistance for competitive exam aspirants. He gave the tips for the preparation of interview and dos & don'ts of the interview.

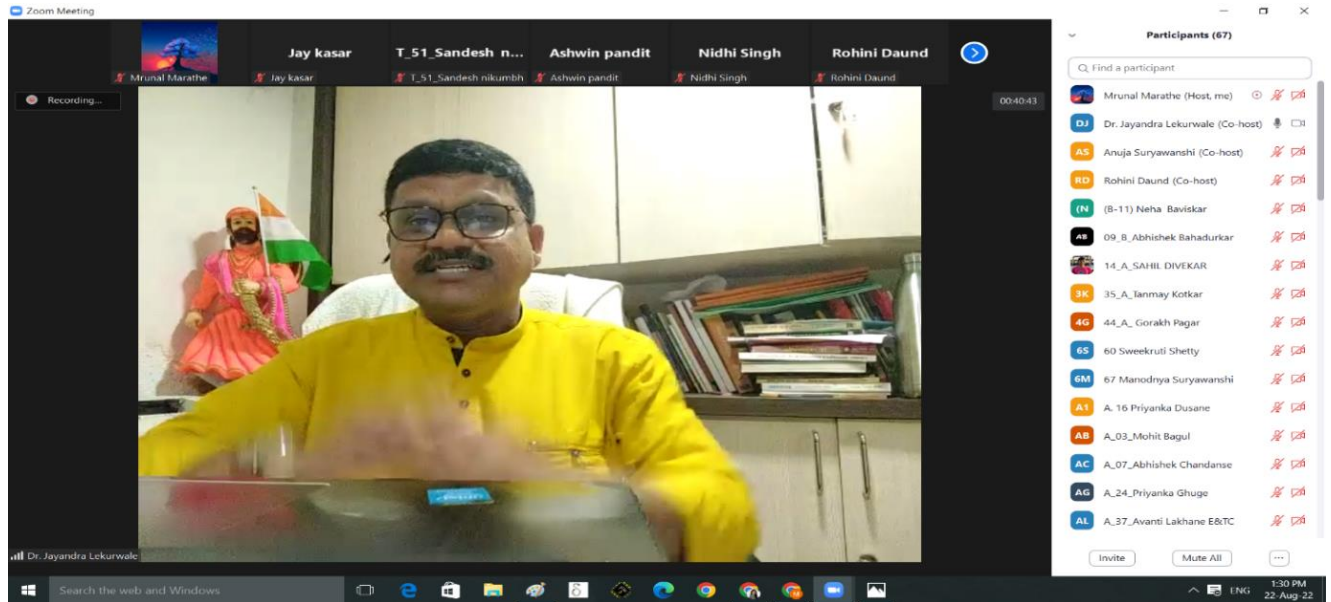

In question session, the students asked various doubts related to subject selection, salary offered, age limit, reservations, duration for preparation and exact time to start for preparation. Dr. Lekurwale sir gave satisfactory answers to all. The lecture was motivating for the students and interacted personally with him to seek information about their area of interest.

The “E - Ganesha Competition - 2022” was held on 29<sup>th</sup> August 2022 in department of E&TC Engineering at Karmaveer Kakasaheb Wagh Institute of Engineering Education & Research (K.K.W.I.E.E.R.), Nashik in collaboration with IETE Nashik Sub-centre. The respective teaching staff members and students were present for the competition.

The session was marked by the presence of guest lecturer Mr. Nikhil Jain (Chief Manager-Engineering, Siemens Ltd, Nashik) along with Prof. Dr. D. M. Chandwadkar. The session was preceded by the chief guest's session on “How to Design your Bright Future”.

The competition received overwhelming response from the students. Everyone presented their ideas and visions for an electronically inspired Ganesha festival celebration. Various projects were presented, such as smart room using bidirectional counter, automatic prasad dispenser, infinite mirror chandelier, and many more. The chief guest and H.O.D evaluated each and every project, understood the workings and provided valuable feedback for the students to work on their ideas in a better way.

After evaluating all the projects, the winners were announced. The chief guest expressed their ideas and valuable feedback for every project. The session culminated with motivation among the students to explore ideas in a creative way and work on their own design and ideas to create a better future.

The Expert Lecture on Raspberry pi was held on 8<sup>th</sup> August 2022 in the department of E&TC Engineering at Karmaveer Kakasaheb Wagh Institute of Engineering Education and Research (K.K.W.I.E.E.R.), Nashik.

The session on “Literature Review” was conducted in the department of Electronics and telecommunication in K. K. Wagh Institute of Engineering Education and Research on 9<sup>th</sup> September 2022 in collaboration with IETE Nashik Sub-centre. The students and respective staff members were present for the session.

The chief speakers Mrs. R. V. Chothé and Mrs. S. V. Shelke presented the importance of literature review in the field of engineering education. The concept of literature review was explained to the students. A literature review is a written summary of journal articles, books and other documents that describe the literature into topics and documents a need for a proposed study. Literature review is the presentation, classification and evaluation of what other researchers have written on particular subject.

The impact of literature survey was explained to the students with examples. It will clarify the conceptual issues of your research related area. It helps the reviewer to learn about the research that they are doing. Lastly, the impact that a literature review has on the researcher was unfolded. The review helps the student to analyze the understanding of the research topic and provides an overview into that topic.

The students clarified their doubts and improved their understanding on the topic by asking questions at the end of the session. The session culminated with an increased sense of understanding in the field of engineering literature.

### Summary:

The workshop on “Android App Development” was held on 12<sup>th</sup> September 2022 in the department of E&TC Engineering at Karmaveer Kaka Saheb Wagh Institute of Engineering Education & Research (K.K.W.I.E.E.R.), Nashik in collaboration with IETENashik Sub-centre. The respective teaching staff members and students were present for the competition.

This session was marked by the presence of guest Mr. Pratik Khanapurkar (Software Developer and Automation Engineer, Freestone Infotech Pvt. Ltd.) along with Prof. Dr. D.M. Chandwadkar and Dr. S.A. Patil (Ugale).

The workshop received an overwhelming response from the students. Everyone present was excited to step into the world of Android App Development. The workshop consisted of developing three android app games namely Seven Up Seven Down, Tic Tac Toe and Emoji Fy Me. The session began with introduction and getting familiar with Android Studio. The chief guest demonstrated each and every step to the students and by the end of the session, everyone had learnt about app development through Java using Android Studio Software.

The students were confident with their abilities to develop an app and were looking forward to develop a game on their own. The session culminated with motivation among the students to explore ideas in a creative way and work on their own design and ideas.

### FeedbackfromStudents:

The Expert Lecture on Critical Thinking was held on 17<sup>th</sup> September 2022 in the department of E&TC Engineering at Karmaveer Kakasaheb Wagh Institute of Engineering Education and Research (K.K.W.I.E.E.R.), Nashik.

The session was conducted by Mrs. Aasawari A. Deshpande. She expert in psychiatry.

In this expert lecture Aasawari Ma'am talked about importance of critical thinking in education and career. Later she explained students what is critical thinking? Critical thinking is the mode of thinking about any subject, problem, or content. It implements and inherent those intellectual thoughts upon them. The best part of critical thinking is, it improves the quality of thinking.

A student who is encouraged to be a critical thinker invariably develops a sense of curiosity of happenings around him/her. A strong and genuine sense of curiosity leads to students wanting to analyse and assimilate information and events. In the process, they form their own informed ideas, mostly out-of-the-box ones, that in turn improves their creativity. Creativity is a skill that all critical thinkers will dally with in their professional and personal life. In the process of finding answers in a logical and rational manner, they will usually be able to get their creative juices flowing.

Critical thinking is not confined to the classroom. In the aftermath of COVID-19, the new economy places a lot of demand on a flexible workforce and employee's ability to analyze information from various sources and come up with ingenious solutions towards the same. An employee with strong critical thinking skills will be valued in a fast-changing workplace. The session was conducted for two hours. Students got the knowledge of As far as 21st century learning is concerned, critical thinking is an important factor.

The Expert Lecture on Quantitative Aptitude & Interview Preparation was held on 24<sup>th</sup> September 2022 in the department of E&TC Engineering at Karmaveer Kakasaheb Wagh Institute of Engineering Education and Research (K.K.W.I.E.E.R.), Nashik. The respective teaching staff members were present for the event.

The session was marked by the presence of guest lecturers Mr Sagar Nikam and Mrs Madhura Shelar .

In this lecture, the topic of the highlight was how we prepare for “Quantitative aptitude and Interview preparation” to perform better in Aptitude and Interview. The session started with the expert’s introduction. Mr Sagar Nikam, completed his bachelor’s degree from a well-known institute i.e College of Engineering Pune in 2005. He had done his master’s degree in MBA marketing from JBIMS in 2010. He is also the founder of ELC. Mrs Madhura Shelar is an alumnus of our institute, who completed his Bachelor’s degree in 2006. She had done her master’s degree in MBA finance from a well-known institute that is JBIMS. She is also the Director of ELC.

The expert talk began with Interview Preparation by Madhura Shelar, She shared her real-life experience with us on how one should prepare for the interview. She highlighted the 3 most important factors to perform better in interviews, communication, content and important presence of mind. Mrs Madhura Shelar ma’am also shared her “Stress Interview” which was held back in Jamnagar for the core engineer profile in Reliance. In which, may Interviewee asked very different and unheard questions, but using the presence of mind and introspection you will be able to perform your best. In the same situation, many candidates will fumble & lose their confidence but ma’am cracked the interview successfully by using her presence of mind. Her suggestion to the students to improve communication skills, good content consumption and to use the remaining period of 2 years to work on “Profile Building” and also “Continue of Legacy to seek something better” motivated students to perform better in the Interview.

Mr Sagar Sir continued the session by introducing the importance of “Quantitative Aptitude”, Sir also highlighted the line that “Aptitude is not just Mathematics it is Problem Solving Ability”. An Aptitude includes Quantitative Aptitude, Data Interpretation, Logical Reasoning and Verbal Ability. Sir has also shared experiences of what happened when he get placed in Infosys, related to how one can move ahead towards progress and growth in one career. For

Department of Electronics & Telecommunication Engineering  
K. K. Wagh Institute of Engineering Education and Research  
Hirabai Haridas Vidyanagari, Amrut Dham, Panchavati, Nashik-422003

warm-up, Sir has also taken some very interesting questions with students related to logical reasoning, and arithmetic problems like finding percentages, and profit and loss without using pen and paper.

This session has helped to aware the students about the real-life experience after completing a bachelor's degree. How one can prepare for aptitude exams in the right direction and perform best in interviews for progress and better career growth.

The Expert Lecture on Tinkercad : Design || Code || Simulate was held on 1<sup>st</sup> October 2022 in the department of E&TC Engineering at Karmaveer Kakasaheb Wagh Institute of Engineering Education and Research (K.K.W.I.E.E.R.), Nashik.

The session was conducted by Mr. Pravin Wankhede. He is working as an assistant professor in Electronics and Telecommunication Engineering Department of SSGMCE College, Shegaon.

The motive behind conducting this expert talk was to introduce the basic idea about Tinkercad and how students can be able to create thousands of different projects and applications.

Mr. Pravin Wankhede sir gave introduction about tinkercad software interface and different components, functionalities available in it.

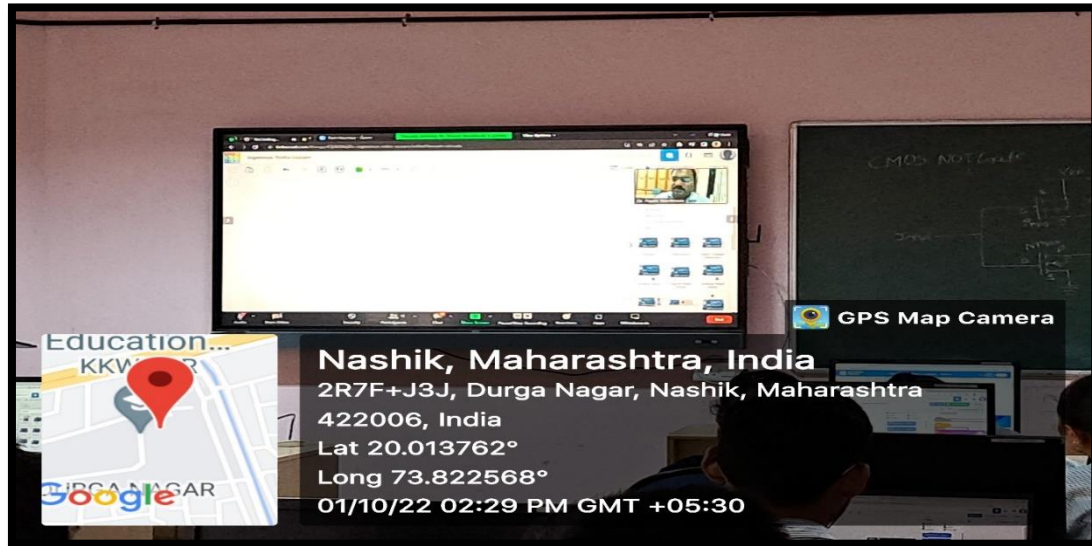

The session was conducted for two hours. It provided the insights of how students can design circuits like LED flashing, 3D designing etc.

The Expert Lecture on How to prepare report in latex was held on 10<sup>th</sup> October 2022 in the department of E&TC Engineering at Karmaveer Kakasaheb Wagh Institute of Engineering Education and Research (K.K.W.I.E.E.R.), Nashik.

The session was conducted by Mrs.Shweta Shevagekar . She is working as an assistant professor in Electronics and Telecommunication Engineering Department of KKWIEER, Nashik.

Initially Shweta Ma'am explained all steps to download and install latex software to students. Also she gave deep introduction about latex software and its uses. LaTeX is a language for creating scientific documents. In fact it might be better to call it the language for creating scientific documents; much its syntax has been borrowed by other environments, in particular where creating anything involving mathematical expressions concerned.

Writing a Latex document is a little like writing a computer program, or a web page: you write your text, marked up with commands to specify its structure? You then compile this with a Latex interpreter, and it generates an output file that you can view on screen or print—most typically a PDF file. As such, just like with programming languages, there is a wide variety of programs available for writing Latex code, from bare text editors to feature-rich development environments. Today we will be using TexStudio for this purpose.

After that She explained all commands useful in latex, how to build report and create a pdf.

The session was conducted for two hours. It provided the insights of how students can prepare report, documents in latex.

An expert lecture on “Entrepreneurship - Primary Wealth Creation” was organized on 5th November, 2022 in department of E&TC Engineering at Karmaveer Kakasaheb Wagh Institute of Engineering Education & Research (K.K.W.I.E.E.R.), Nashik in collaboration with IETE Nashik Sub-center. The respective teaching staff members and students were present for this session.

Everyone present were excited to step into the world of Entrepreneurship. Mr. Vishal Jategaonkar guided us on startups and how to develop business. And give the brief about the process of developing, organizing, and running a new business to generate profit while taking on financial risk.

During the growth stage, a startup has reached the level of having a consistent customer base and a steady source of income. This is when the company's cash flow begins to increase rapidly. Because the company is growing, this is when a business may start to hire more employees to help manage the workload. It is predicted that businesses that are based on collaborative economy models will enjoy immense success in the next few years. Some good examples are Airbnb, Uber, Ola and Lyft. These types of businesses not only help the final customers, but also assist the service providers and ultimately make commissions.

He discussed some fastest growing startups like, Founded by Nykaa, Falguni Nayar in 2012, Nykaa is a Mumbai-based startup. It is an online beauty and wellness store that provides its customers with good-quality goods at reasonable prices. Udaan , Founded by Amod Malviya, Sujeet Kumar, and Vaibhav Gupta in the year 2016, Udaan is yet another Bangalore-based startup focusing on eCommerce, retail, business development, and, most importantly, the B2B Industries.

He also discuss unicorn, Unicorn is the term used in the venture capital industry to describe a startup company with a value of over \$1 billion And add his views like, Wealth creation refers to building wealth through a variety of methods using financial products. When you invest in financial products for a long period, you get back higher returns. The session culminated with motivation among the students to explore ideas in a creative way and work on their own design and ideas.

The Expert Lecture on The Art of Reading People- Body Language Training was held on 12<sup>th</sup> November 2022 in the department of E&TC Engineering at Karmaveer Kakasaheb Wagh Institute of Engineering Education and Research (K.K.W.I.E.E.R.), Nashik.

The session was conducted by Mr. Vishal Jategaonkar. He is a Center Director of T.I.M.E, Nashik, Nashik Road Training and BOS (Board of Studies) Member for K.K.Wagh College of Engineering and K.K.Wagh College of Management.

Vishal sir told the importance of positive body language, Also he said that Communication is a critical workplace skill. Whether it's a boardroom meeting or a sales pitch, people don't just pay attention to what you're saying, they also notice other nonverbal cues such as your smile, facial expressions, eye contact, gestures and posture. In other words, they also listen to what your body language is saying.

Some important topics covered in the session as below:

- **Kinesics** (pronounced 'kineesicks' with stress on the 'ee') is the modern technical word for body language, and more scientifically the study of body language. The word kinesics was first used in English in this sense in the 1950s, deriving from the Greek word kinesis, meaning motion, and seems to have first been used by Dr Ray Birdwhistell, an American 1950s researcher and writer on body language.
- **Proxemics** is the technical term for the personal space aspect of body language. The word was devised in the late 1950s or early 1960s by Edward Twitchell Hall, an American anthropologist. The word is Hall's adaptation of the word proximity, meaning closeness or nearness.

The session was conducted for two hours. Students understood that in the business world, your body language illustrates your confidence and commitment in more ways than you realize.

The Expert Lecture on Physical fitness for healthy lifestyle was held on 19<sup>th</sup> November 2022 in the department of E&TC Engineering at Karmaveer Kakasaheb Wagh Institute of Engineering Education and Research (K.K.W.I.E.E.R.), Nashik.

The session was conducted by Dr. Mustafa A. Topiwala. He is Physiotherapist and Managing Partner at Dr. Pimparikar's Sports Med Rehab.

The session started with brief introduction of the speaker. The complete session revolved around physical fitness and importance of good health in day to day life.

Sir shared main causes of not doing exercise on regular basis and problems causes due to it. Major reasons for not doing exercise include: 1. Injuries 2. Busy schedule 3. Laziness

These some common causes could lead to an unfit body inviting a lot of diseases and disorders in body. Major problems includes:

1. Obesity
2. Text neck syndrome
3. Neck pain
4. Back and lower body stiffness
5. Blood pressure

After conveying the importance of regular exercising, some basic stretching and mobility exercises were taught to the students and it hardly took about 5 min to complete the exercise.

Speaker also talked about setting goals and finding motivation and giving 15-20 min daily for exercising and physical fitness. He was accompanied with his trainee and staff member Mr Muhammad who is a national level kickboxing bronze medalist. He taught students some basic stance and self-defense techniques. The session end on good note followed by few questions from students which were answered by the speaker .The overall impact of the session was great , everyone took a lot from the session and realized the importance of physical fitness.

The Expert Lecture on IPR and Copyright was held on 26<sup>th</sup> November 2022 in the department of E&TC Engineering at Karmaveer Kakasaheb Wagh Institute of Engineering Education and Research (K.K.W.I.E.E.R.), Nashik.

The session was conducted by Dr.S.A.Patil (Ugale).She is associate professor and UG coordinator in E&TC department of KKWIEER, Nashik.

The session started with brief introduction of the speaker. Dr. Sunita A. Patil Ma'am started the session by giving overview of Intellectual Property Rights (IPR). Intellectual property rights are the rights given to persons over the creations of their minds. They usually give the creator an exclusive right over the use of his/her creation for a certain period of time.

Dr. Sunita A. Patil Ma'am covered following points about IPR:

Intellectual property rights are customarily divided into two main areas which are Industrial Property and copyright and related rights.

Later Ma'am explained the concept of plagiarism. Plagiarism is the fraudulent representation of another person's language, thoughts, ideas, or expressions as one's own original work. She explained students how to make non-plagiarized paraphrase using examples.

Also Dr. Sunita A. Patil Ma'am explained that patent is an exclusive right granted for an invention, which is a product or a process that provides a new way of doing something, or offers a new technical solution to a problem. Patents are granted by national patent offices after publication and substantial examination of the applications.

Also she conducted quiz on the mentimeter based on the copyright concept.

Some of the important points covered in the session are below:

- Trade Mark: A name of an enterprise or a Mark capable of being represented graphically, distinguishing the goods or services of one person from those of others e. g., LUX, Godrej, TVS, Telco, 555, APPLE.
- Trade Marks are registered by national trade mark registries and are valid in that country
- Registration is made after examination and publication
- Period of registration is for 10 years but can be renewed indefinitely

- Geographical Indication is an indication which identifies goods as agricultural goods, natural goods or manufactured goods as originating, or manufactured in the territory of country, or a region or locality in that territory, where a given quality, reputation or other characteristic of such goods is essentially attributable to its geographical origin.
- Licence is a permission granted by an IP owner to another person to use the IP on agreed terms and conditions, while he continues to retain ownership of the IP

At the end of session Ma'am told students patent filling procedure.

Dr. K. N. Nandurkar  
Principal

The Expert Lecture on How to prepare report in latex was held on 3<sup>rd</sup> December 2022 in the department of E&TC Engineering at Karmaveer Kakasaheb Wagh Institute of Engineering Education and Research (K.K.W.I.E.E.R.), Nashik.

The session was conducted by Mrs. Shweta Shevagekar. She is working as an assistant professor in Electronics and Telecommunication Engineering Department of KKWIEER, Nashik.

Initially Shweta Ma'am gave information about ShareLaTeX software which is online presentation maker software in LaTeX. It is an open source software. She explained students steps to register on ShareLatex software.

Shweta Ma'am has discussed following points in the session :

There are a number of important benefits to using LATEX for presentations.

- **Portability:** Most LATEX slide packages, including HA-prosper, are designed to produce PostScript or PDF files. These formats are standard in the computing industry and viewers for them are widely available for all common platforms. This means, for example, that it's easy to start writing a presentation on your office UNIX machine and then take it home to finish and preview on your MS-Windows PC. More importantly, having a PDF version of your presentation means that there is no need to arrange for your venue to have PowerPoint, StarOffice, or other uncommon or expensive software; nor do you need to bring along your own laptop with custom software. Most computers nowadays have some sort of PDF viewer installed, but even if not, there are several zero-cost viewers available. In most cases, you can simply copy your PDF presentation to a floppy, CD, or USB key drive, slip it in your pocket, and head to your presentation venue.
- **Ease of collaboration:** Because LATEX files are plain text, it is easy for multiple authors to collaborate to write a presentation, even if not all of them have LATEX. Furthermore, keeping track of versions is easy and storage-efficient using, for example, CVS. Even without sophisticated versioning software, changes from colleagues can be merged in using standard text processing tools such as diff and patch. Compare this to the situation with most presentation software, which use non-human-readable binary file formats and may not have built-in support for collaboration and versioning.
- **Free license and community support:** HA-prosper and its attendant programs (LATEX, Ghost script, etc.) are free software, not just in the sense that you can legally obtain copies without paying for them, but also in that you are free to run,

copy, distribute, study, change, and improve them for any purpose. If HA-prosper doesn't work exactly the way you want, you can examine and adjust the code yourself, or hire a knowledgeable programmer to do it for you. Furthermore, LATEX and its packages have an extensive support network through public mailing lists, user groups, publications, Usenet newsgroups, and private consulting firms.

- **Content before style:** An inherent problem with the WYSIWYG paradigm used by most presentation software is that it conflates the tasks of composition (fixing one's ideas into words in a logically and semantically structured document) and typesetting (determining the superficial physical appearance of a document via, for example, color and font settings). LATEX, however, encourages writers to concentrate on content rather than style. Unlike with WYSIWYG editors, which do not always distinguish between semantic and physical markup, the physical appearance of an HA-prosper presentation is trivial to change even after the document has been written.
- **Reuse LATEX code:** Those who already use TEX or LATEX to write their papers can leverage their existing knowledge rather than learn a whole new program for making slides. And for conference presentations based on existing papers, using LATEX to produce the slides can save you a lot of time. For example, it's much easier to copy and paste complex equations, figures, and tables from the source document than it is to tediously re-key them in a GUI editor. The same goes for incorporating citations and a list of references from your paper's BIBTEX bibliography.
- Basic Syntax of making presentation is:

```
\documentclass [options] {prosper} \usepackage[options] {HA-prosper}
```

```
\title Title of presentation}
```

```
\author (Name of author)}
```

```
\begin{document}
```

```
Amaketitle
```

Department of Electronics & Telecommunication Engineering

Hirabai Haridas Vidyanagari, Amrut Dham, Panchavati, Nashik-422003

\begin{slide} [options] {Slide title} Material for the slide

\end{slide}

\end{document}

The session was conducted for two hours. It provided the insights of how students can prepare presentation in latex.

**Feedback from students:**

The instructor explained the topic clearly and used relevant examples
